collection.

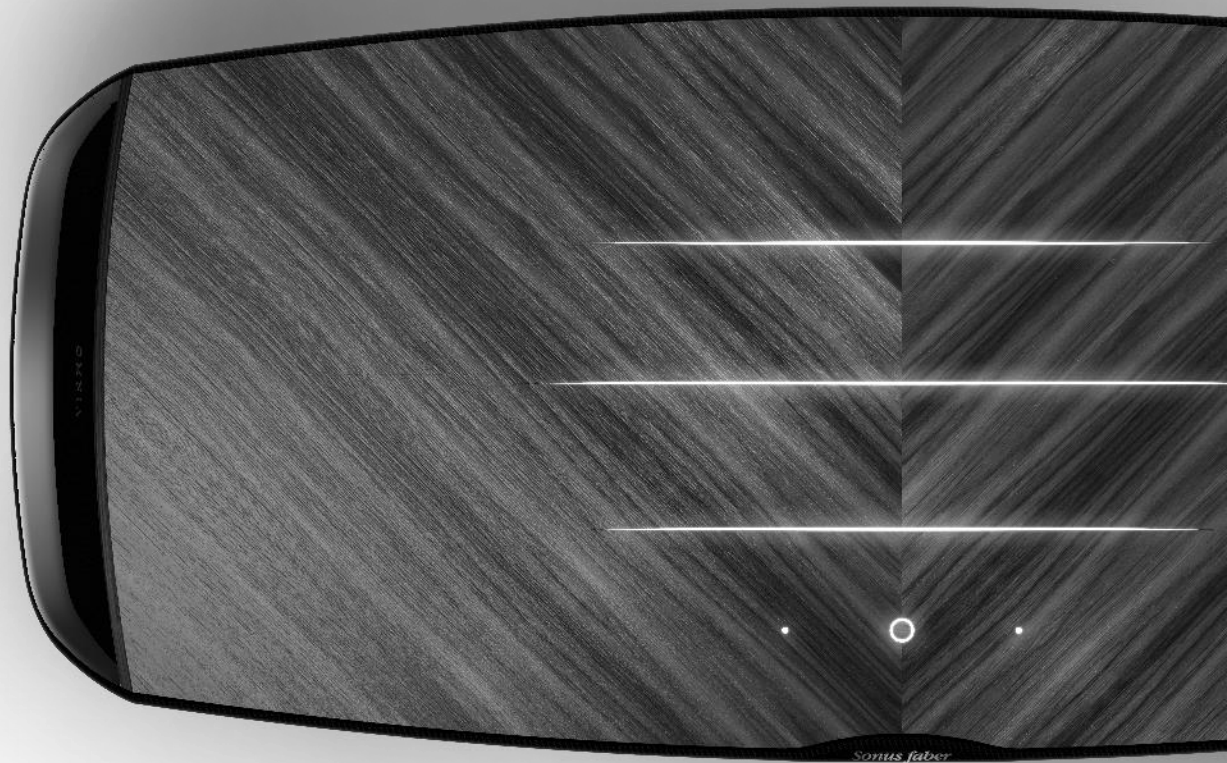

WALNUT

GRAPHITE

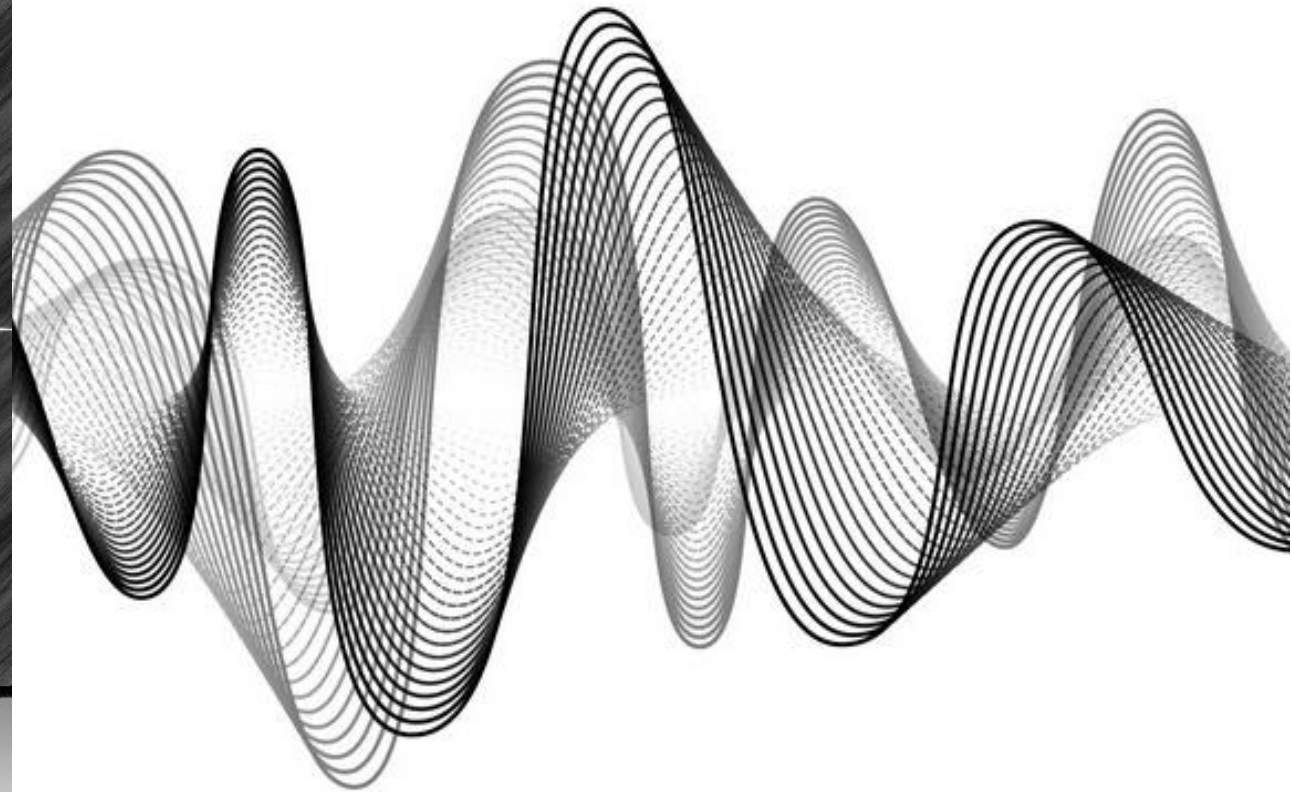

SENSO™

*In philosophy **Senso** is the ability to perceive the action of an object, both inside and outside the body.*

The surface feels the user interaction and express what happens inside the device.

CRESCENDO™

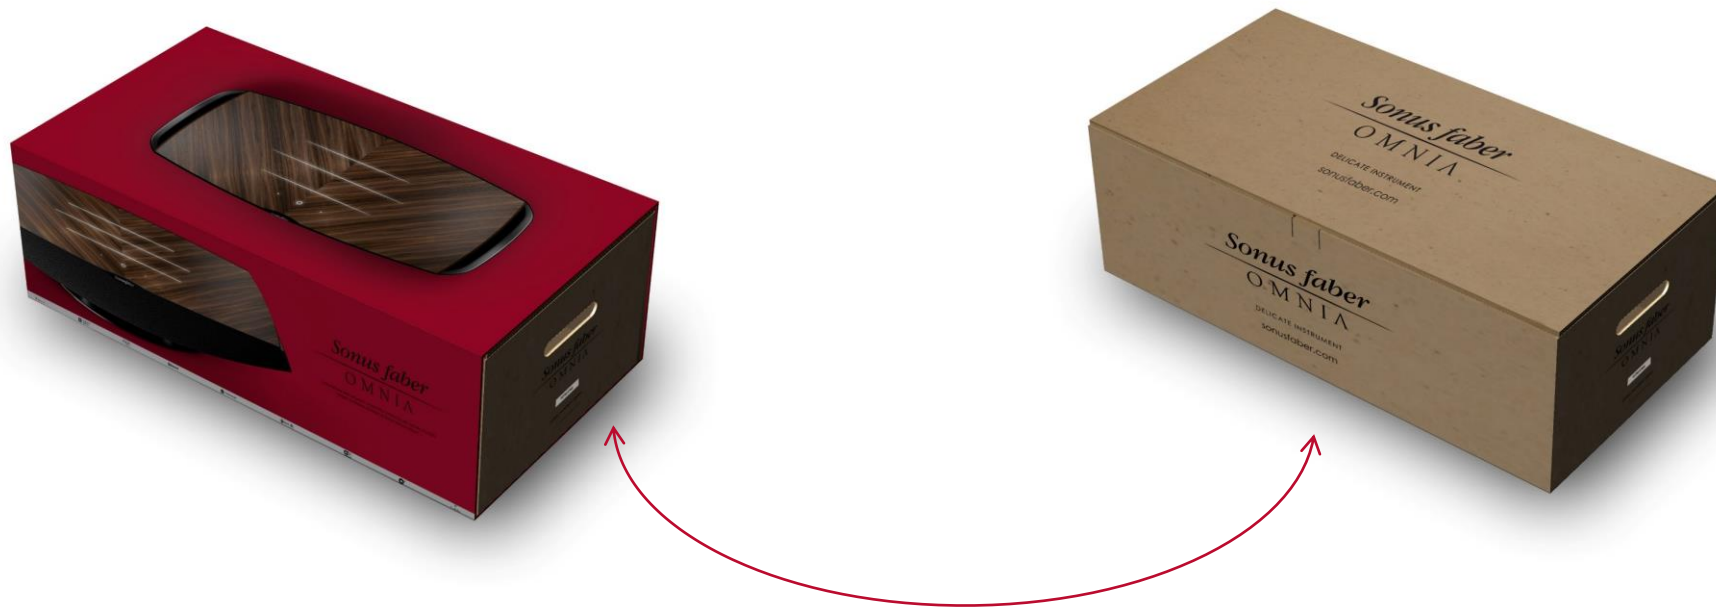

*In music the **Crescendo** is a dynamic indication that involves a gradual increase in the intensity of the sound.*

The algorithm gives the illusion of a wider sound, more intense and enlarged.
