This multi-award winning 'Plug and Play' design utilises our handmade RB110 tonearm, with pre-set bias and a factory fitted Carbon cartridge. Set-up is possible in under 30 seconds and delivers incredible performance well beyond its price point.

**FEATURES:** RB110 TONEARM • CARBON CARTRIDGE FITTED • PHENOLIC RESIN PLATTER • 24 V LOW NOISE MOTOR

AVAILABLE IN GLOSS:

All the features of the award-winning Planar 1 turntable with the addition of a built-in high quality MM phono stage, making this the ultimate 'Plug and Play' turntable.

**FEATURES:** RB110 TONEARM • CARBON CARTRIDGE FITTED • PHENOLIC RESIN PLATTER • INTEGRATED MM PHONO STAGE • 24 V LOW NOISE MOTOR

AVAILABLE IN GLOSS:

Beautifully simple to set up, the Planar 2 is built on our stunning acrylic skin plinth. Featuring the handmade RB220 tonearm, low noise motor and 10 mm glass platter. The Planar 2 is supplied with a factory fitted Carbon cartridge. Stunning performance guaranteed straight out of the box.

**FEATURES:** RB220 TONEARM • CARBON CARTRIDGE FITTED • 10 mm GLASS PLATTER • 24 V LOW NOISE MOTOR

AVAILABLE IN HIGH-GLOSS:

The iconic Planar 3 comes fitted with the handmade precision RB330 tonearm. Carrying just two components over from the previous model, the latest Planar 3 is engineered to bring your music to life. A serious performer, this four time What Hi-Fi? "Product of the Year" is a must for demonstration. Available with an Elys 2 cartridge factory fitted (optional).

**FEATURES:** RB330 TONEARM • 12 mm OPTI WHITE POLISHED GLASS PLATTER • DOUBLE BRACE TECHNOLOGY • ELYS 2 MM CARTRIDGE FACTORY FITTED (OPTIONAL) • 24 V LOW NOISE MOTOR - COMPATIBLE WITH NEO TT PSU

AVAILABLE IN HIGH-GLOSS:

The Planar 6 is constructed around a unique ultra-light foam core plinth and HPL laminates. It is designed to deliver a level of performance beyond anything at this price. The Planar 6 features the RB330 tonearm and a dual layer float glass platter. The supplied Neo turntable power supply provides convenient speed selection, advanced anti-vibration control, and electronic fine speed adjustment.

**FEATURES:** RB330 TONEARM • DUAL LAYER FLOAT GLASS PLATTER • DOUBLE BRACE TECHNOLOGY • TANCAST 8 FOAMCORE PLINTH • CUSTOM MATCHED NEO PSU • EXACT, ANIA OR ANIA PRO MC CARTRIDGE FACTORY FITTED (OPTIONAL)

AVAILABLE IN MATT:

The Planar 8 was inspired by the ultimate Rega turntable, the Naiad. Built around an ultra lightweight skeletal Tancast 8 foam core plinth with HPL laminates. This new high rigidity plinth creates the perfect platform for the precision RB880 tonearm, lightweight bearing assembly, 24 V synchronous low noise motor and triple layer float glass platter.

**FEATURES:** RB880 TONEARM - TRIPLE LAYER GLASS PLATTER - DOUBLE BRACE TECHNOLOGY - TANCAST 8 FOAMCORE - SKELETAL PLINTH • CUSTOM MATCHED NEO PSU • ANIA, ANIA PRO OR APHETA 3 MC CARTRIDGE FACTORY FITTED (OPTIONAL)

AVAILABLE IN MATT:

The Planar 10 was inspired by the ultimate Rega turntable, the Naiad. Built around our ultra-light skeletal plinth, constructed from Tancast 8 core and covered in a high-pressure laminate (HPL) skin. The Planar 10 is the first production turntable to use ceramic bracing which provides the ultimate rigid surface for mounting the precision reference RB3000 tonearm and custom central bearing assembly. The Planar 10 is also fitted with a bespoke ceramic oxide platter which is diamond cut during manufacture for ultimate accuracy and speed stability. The Rega 24 V synchronous motor is controlled by our most advanced outboard power supply, the P10-PSU. This supply delivers the ultimate in motor vibration reduction, electronic fine speed adjustment and the convenience of electronic speed change. The Planar 10 is designed to deliver the ultimate in Rega performance by extracting more information from the vinyl groove than ever before.

**FEATURES:** RB3000 TONEARM • CERAMIC PLATTER • CERAMIC TOP BRACE • TANCAST 8 FOAMCORE PLINTH • ADVANCED CUSTOM PSU • APHETA 3 OR APHELION 2 MC CARTRIDGE FACTORY FITTED (OPTIONAL)

AVAILABLE IN MATT:

## CARBON

- Carbon cantilever
- Elliptical profile
- Detachable stylus

## RB78

- Handmade
- Mono cartridge
- Elliptical profile
- For 78 recordings

## BIAS 2

- Handmade
- Stereo cartridge
- Elliptical profile
- Hand adjusted for improved channel balance and stereo image.

## ELYS 2

- Handmade
- Stereo cartridge
- Elliptical profile
- Rega 3 point fixing
- Premium hand adjusted fine channel balance for advanced stereo image.

## EXACT

- Handmade
- Stereo cartridge
- 'Vital' nude diamond profile
- Rega 3 point fixing
- Ultimate hand adjusted fine channel balance for optimum stereo image.

Rega offers a unique selection of cartridges. A complete range of moving magnets and three moving coils. All of which are hand built (excluding the Carbon) by our highly trained technicians to the tightest tolerance.

## ANIA

The Ania was designed to complement the Planar 3 and Planar 6 turntable models. Housed in a unique PPS ultra-rigid body, the Ania shares the same highly complex, hand-wound micro coil and magnet assembly found in the more expensive models. Using an aluminium cantilever mounted with an elliptical profile stylus, the Ania delivers a balanced and dynamic performance which will bring a new dimension to your vinyl collection.

## ANIA PRO

The Ania Pro uses our advanced 'Vital' profile nude diamond stylus. This delivers tight bass, warm midranges and accurate top end frequencies to offer a well-balanced and detailed performance. The Ania Pro is housed in a unique PPS highly rigid body and features a super high-powered, neodymium magnet and a coil meticulously handwound on to an iron micro cross. This miniature assembly allows us greater freedom to track the vinyl groove, guaranteeing even more detail is extracted from the vinyl.

## APHETA 3

Housed in a custom body, machined from a single piece of aluminium, the Apheta 3 uses an aluminium cantilever and an advanced 'fine line' profile, nude diamond stylus mounted through 90 degrees. This assembly is coupled with a super high-powered neodymium magnet, and our micro coil, meticulously handwound on an iron cross that is fifty percent smaller than the original design. This coil weight reduction allows greater freedom to track the vinyl groove ensuring even more detail is extracted from the vinyl. Designed to complement the high end Rega range.

## APHELION 2

REF

The Aphelion 2 is the ultimate in micro engineering and design. Our unique handwound micro cross and coil assembly is built directly onto a Boron rod cantilever. The advanced 'fine line' profile nude diamond is then mounted through 90 degrees which offers extreme levels of stiffness and control over the stylus. This design requires a 'zero tolerance' approach to engineering to achieve the highest level of performance from a Rega cartridge to date. Designed to complement the reference range of Rega turntables including the Naiad.

## FONO MINI A2D MK2 (MM)

The Fono Mini A2D is a high-quality phono pre-amplifier for use with any moving magnet cartridge. The addition of a USB interface allows you to easily transfer vinyl to your PC if required. The restyled Fono Mini A2D amplifier offers improved usability, exceptional performance and incredible value for money while promising to be a valuable addition to any hi-fi set up.

**FEATURES:** MM PHONO PRE-AMPLIFIER COMPATIBLE WITH ALL MM CARTRIDGES  
• FEATURES A USB OUTPUT • A2D FUNCTIONALITY

## FONO (MM or MC)

Two versions of the Fono are available; moving magnet (MM) or moving coil (MC). The Fono MM is a compact, high specification, moving magnet phono stage. The Fono MM uses a fully discrete, cascaded, complementary amplifier input stage, a configuration designed to optimise the performance of your moving magnet cartridge. Now housed in a brand new case styled to match our latest range of electronic components.

The Fono MC is an exceptionally high-quality moving coil phono stage designed to maximise the potential of any MC cartridge. Engineered to complement our latest Rega range of moving coils, you will find full adjustability for loading and two different gain settings conveniently located on the rear panel, making the Fono MC the ideal companion for almost any MC cartridge.

## ARIA MK3 (MM & MC)

Housed within our latest half width custom designed case are two entirely separate, high performance phono stages. One fully adjustable, dedicated moving coil and one moving magnet. Both stages have their own separate input sockets and input pre-amplifier circuitry. This enabled us to design bespoke input circuitry for each cartridge type without compromises, offering an exceptional level of performance and flexibility for both styles of cartridge.

**FEATURES:** SWITCHABLE PHONO PRE-AMPLIFIER COMPATIBLE WITH MM AND MC CARTRIDGES • FULLY ADJUSTABLE MC STAGE

## AURA MC

REF

The reference Aura MC stage is a fully adjustable, three stage, all symmetrical pre-amplifier designed purely to extract the best performance from any moving coil cartridge. Housed in a completely redesigned custom case, the Aura is the culmination of decades of electronic design development from our team of dedicated Rega engineers. If you are a vinyl connoisseur, the Aura is an absolute must for demonstration.

**FEATURES:** MC PHONO PRE-AMPLIFIER COMPATIBLE WITH ALL TYPICAL LOW OUTPUT MOVING COIL CARTRIDGES • FULLY ADJUSTABLE

## io

The **io** has been designed to offer exceptional Rega performance at an affordable price point. It uses the same amplifier stage as the multi-award winning Brio now designed to run at 30 W per channel into 8  $\Omega$ . The **io** features two line level inputs, a high specification Rega moving magnet phono stage, and a dedicated high quality headphone output. The **io** will integrate seamlessly into any home audio system whilst remaining simple to use and easy to set up. A must for demonstration.

**FEATURES:** INTEGRATED PHONO STAGE • HEADPHONE SOCKET • MINI REMOTE CONTROL • ALL NEW CUSTOM DESIGNED CHASIS

## BRIO

The Brio offers 65 W per channel into 6  $\Omega$  and a completely new case to house its improved circuits and parts. It now sits in a revised, four-part chassis which boosts the Brio's heat sinking capabilities. The new Brio has a cleverly integrated headphone socket specially designed to avoid interference with the audio circuit and as you would expect from Rega, a very high specification moving magnet phono stage is built in as standard.

**FEATURES:** INTEGRATED PHONO STAGE • HEADPHONE SOCKET • MINI REMOTE CONTROL

## ELEX-R

The multi-award winning Elex-R is a sublime blend of the Brio design, delivering 90 W per channel into 6  $\Omega$ , with the power circuits and advanced phono stage of the Elicit-R. Rega's engineers have achieved the perfect balance of power, control and dynamics, delivering a performance that always puts the music first.

**FEATURES:** INTEGRATED PHONO STAGE • REMOTE CONTROL

## ELICIT-R

Providing 127 W per channel into 6  $\Omega$ , you will never be short of power. The Elicit-R will drive even the most difficult loads with ease and incorporates a high quality MM phono stage input which can be switched to a line level input if so desired. You will find multiple inputs available on the rear panel for perfect integration into any system. A must for demonstration.

**FEATURES:** INTEGRATED PHONO STAGE • REMOTE CONTROL • DIRECT INPUT

## AETHOS

REF

The Aethos stereo amplifier is housed in a brand new, custom designed case. Employing four 160 W 16 Amp output transistors per channel, this delivers 156 W per channel into 6  $\Omega$ . The Aethos is a dual mono design using a custom wound toroidal transformer and regulated supplies for the sensitive amplification and driver stages. The pre-amplifier stage uses class-A discrete circuitry throughout. The Aethos is a no compromise product with one goal, to deliver your music as faithfully as possible.

**FEATURES:** HEADPHONE SOCKET • REMOTE CONTROL • DIRECT INPUT • 156 W PER CHANNEL INTO 6  $\Omega$  (125 W PER CHANNEL INTO 8  $\Omega$ )

## OSIRIS

REF

The Osiris is the culmination of more than three decades of experience in solid-state amplifier development. A no compromise, super high-performance amplifier delivering 162 W into 8  $\Omega$ . A dual mono amplifier housed in a custom Rega CNC machined aluminium case. Designed around "minimalist" high gain power amplifier and "passive pre-amplifier" circuit topology, the Osiris offers unrivalled performance and build quality.

**FEATURES:** GALVANICALLY ISOLATED POWER SUPPLY • NICHICON AUDIO GRADE CAPACITORS • PACKAGE PRICE AVAILABLE WITH ISIS CDP • CNC REFERENCE REMOTE CONTROL • DIRECT INPUT

## APOLLO

The Apollo CD player utilises Rega's own custom chipset and software offering a truly unique level of performance for a CD player. Development of the analogue, digital and control domains ensured direct improvements of both analogue and digital outputs, making the Apollo a perfect partner for the Rega Brio amplifier.

**FEATURES:** HIGH SPECIFICATION WOLFSON DAC • ADVANCED OUTPUT AMPLIFIER CIRCUIT • ADVANCED DIGITAL POWER SUPPLIES • REGA'S UNIQUE CD CONTROL SOFTWARE • REGA MINI REMOTE CONTROL

## SATURN-R

The Saturn-R CD-DAC is essentially two products in one, a high specification CD transport and an independent DAC circuit offering the highest possible resolution up to and including 24 bit 192 kHz. The Saturn-R has two optical inputs, two Co-Axial inputs, a fully asynchronous USB and an added 'direct' digital output from the CD playback section ensuring perfect integration into any audio system.

**FEATURES:** CD PLAYER AND 24 BIT 192 KHZ ADVANCED DAC • NEW WOLFSON DAC • ENHANCED OUTPUT AMPLIFIER CIRCUIT • ENHANCED DIGITAL POWER SUPPLIES • REGA'S UNIQUE CD CONTROL SOFTWARE • REGA SYSTEM REMOTE CONTROL

## ISIS

REF

Rega's flagship CD player is a product manufactured to the highest achievable quality, inside and out. The Isis features discrete class A operational amplifiers and filters optimised for sonic performance. Using twin Burr Brown DACs running in parallel dual mono mode, offering wide dynamic range with low distortion. Each laser mechanism is graded and matched to the servo circuit.

**FEATURES:** REGA'S ADVANCED CD TECHNOLOGY • TWIN BURR BROWN DACS • REGA 'K-POWER' SMOOTHING CAPACITORS • CUSTOM DESIGNED REFERENCE CASE • PACKAGE PRICE AVAILABLE WITH OSIRIS AMPLIFIER • CNC REFERENCE REMOTE CONTROL

## VALVE ISIS

REF

The Valve Isis shares the same digital and USB sections as found in the solid-state version, however, the analogue stage is valve based with passive filtering. This stage uses two military specification triple mica 5814A (ECC82/12AU7) triodes being driven by the revolutionary Wolfson WM8741 ultra high performance digital to analogue converter. Each laser mechanism is graded and matched to the servo circuit.

**FEATURES:** REGA'S ADVANCED CD TECHNOLOGY • TWIN WOLFSON DACS • REGA 'K-POWER' SMOOTHING CAPACITORS • CUSTOM DESIGNED REFERENCE CASE • PACKAGE PRICE AVAILABLE WITH OSIRIS AMPLIFIER • CNC REFERENCE REMOTE CONTROL

## KYTE

The Kyte loudspeaker system has been designed to deliver the true Rega sound at an affordable price. Using our own ZRR high frequency unit and a handmade pair of MX-125 bass-mid drivers, this compact bookshelf speaker is designed to complement any hi-fi or audio system.

**FEATURES:** PHENOLIC RESIN CABINETS • FULLY BRACED • HANDMADE MX-125 BASS-MID UNIT • REGA DESIGNED ZRR HIGH FREQUENCY UNIT

AVAILABLE IN: 

## RX RANGE (RX3 RX1 RX5)

The RX loudspeaker range is presented in premium cabinets, finished with a selection of high quality, real wood veneers. Rega loudspeakers all utilise our own handmade custom bass and mid-range drivers, coupled with our unique ZRR high frequency units. This unique driver array delivers a natural high frequency, with tight controlled bass and exceptional mid-range to deliver a perfectly balanced and musical performance every time.

AVAILABLE IN:   

FOR FULL REGA PRODUCT RANGE PLEASE VISIT [www.rega.co.uk](http://www.rega.co.uk)

# SYSTEM ONE

The perfect all in one solution, System One is designed to be simple to set up and get you spinning your vinyl in minutes. System One delivers a full analogue experience straight out of the box, consisting of the multi-award winning Planar 1 turntable, the **io** amplifier and Kyte loudspeakers. The **io** amplifier has a high quality built-in phono stage, two line level inputs and a headphone socket offering plenty of connectivity options. System One is a unique, analogue audio system designed to bring you the true Rega signature sound at an affordable price.

**INSIDE THE BOX:** PLANAR 1 TURNTABLE • **io** AMPLIFIER • KYTE LOUDSPEAKERS • MINI REMOTE • SET OF 3 m SPEAKER CABLE

PLANAR 1:  **io:**  **KYTE:** 

### ATLAS MK2

The Atlas is a premium tracking force gauge designed to provide reliable and accurate measurement whilst optimising set-up of your cartridge and tonearm. Inside the durable aluminium casework is a highly stable load cell and precision amplification circuitry. There is also a custom designed front guard to protect the measuring element and provide easy alignment during use. The MK2 version boasts a wider weight range and improved stability.

**FEATURES:** TRACKING RANGE: 0.5 g - 10 g

### NEO TTPSU

The Neo PSU is the ideal upgrade for Planar 3, RP3 or any Rega turntable fitted with our 24 V Upgrade Kit (or older model fitted with a DIN lead input). Using the same DSP generator found in the PL10 PSU, the Neo turntable power supply is built upon a high stability crystal. The Neo features an advanced anti-vibration circuit, fine motor speed adjustment and the convenience of electronic speed change.

**FEATURES:** COMPATIBLE WITH 24 V REGA TURNTABLES WITH A DIN LEAD INPUT (SUCH AS PLANAR 3). CHECK WEBSITE FOR DETAILS.

### STROBE KIT

This accessory is designed to evaluate the speed of any turntable. The hand-held strobe unit generates a 100 Hz pulsed light source for use with the supplied 180-line stroboscopic disc. Designed as the perfect partner for the speed adjustable Rega Neo PSU. Simply place the supplied stroboscopic disc directly on the turntable mat. With the player running at 33 1/3, 45 or 78 RPM, hold the strobe LED directly above the lines to evaluate the speed of the turntable.

### WALL BRACKET

The next generation of turntable wall bracket is manufactured from lightweight 3mm laser cut folded aluminum. This completely new design is 1.2 kg lighter and more rigid than the previous model and is specifically designed to complement the latest range of lightweight Rega turntables.

**FEATURES:** COMPATIBLE WITH PLANAR 1, PLANAR 2, PLANAR 3 & PLANAR 6. N.B. A SMALLER CUSTOM BRACKET IS AVAILABLE FOR PLANAR 8 & PLANAR 10, SEE WEBSITE FOR DETAILS.
