## Introducing Tzero MKIII

Tzero MKIII is every bit a true REL, just smaller. It enriches even modest systems with power and natural bass by bringing the quality and full REL connectivity suite along with an all-new aluminum cone that provides much greater stiffness to the driver for punch and a powerful, reliable Class D amplifier, all at an attractive price point and size. Ideal for apartments, flats, studies, anywhere space is limited.

Tzero is, in many ways, the most difficult design we have ever executed because never before have we delivered so much for so little. Five coats of your choice of black or white high gloss lacquer as in all Serie T, NextGen Class D amplifiers, our famous High Level Input, plus a separate .1/LFE input stage with its own volume control to get theatre levels AND music perfect without racing to adjust or looking for a remote control. The jewel of the MKIII is the new aluminum-coned driver, a rugged 6.5" unit with exceptional output and low bass extension for its size. While it won't drive medium or large rooms hard,

larger models we make plenty of that handle that task, Tzero MKIII remains a miracle in miniature.

At REL every design begins by defining and designing the best bass engine for a given application. With its new aluminum-coned long throw 6.5" driver, the MKIII is powerful and articulate, delivering surprisingly deep bass. Able to fill smaller spaces effortlessly. Have a much larger space? Turn to one of our larger models, there are plenty to choose from.

Though Tzero MKIII is REL's entry level, that doesn't mean it can't punch far above its weight class. 100 high-current watts from a NextGen Class D amp means it holds its head high and is capable of delivering many years of satisfying performance. We feature the same high-quality input filters, crossovers and limiters as our larger models. Tzero MKIII includes a full REL connectivity suite, fast 8ms delay filter set and our famed High Level Input as well as a separate .1/LFE input with its own level control and a standby circuit that reliably comes alive at very low levels.

### Specifications

#### TZERO MKIII

Type:	Sealed, down-firing active woofer
Drive Unit:	6.5in., 165mm long-throw aluminium cone, steel chassis
Lower Frequency Response:	37 Hz at -6 dB in room
Input Connectors:	HIGH LEVEL Neutrik Speakon, LOW LEVEL single phono, LFE phono
Input Impedance:	HIGH LEVEL: 150k, Low Level: 10k, .1/LFE: 10k ohms
Gain Control Range:	80 dB
Power Output:	100 Watts (RMS)
Phase Switch:	Yes, 0 or 180 degrees
Amplifier Type:	Class D
Protection System	
Fully Electronic SET-SAFE:	Yes
D.C. Fault:	Yes
Output Short:	Yes
Mains Input Voltage:	100-240 volts
Fuse:	2.00 Amp semi delay
Dimensions (WHD):	8.5 x 9.5 x 10.25 in., (216 x 241 x 260 mm) Including Feet and Rear Panel Controls
Net Weight:	15 lbs. (6.8 kg)
Finish:	Gloss Piano Black or White Lacquer
Supplied Accessories	
Mains Lead:	Yes
Neutrik Speakon Interconnect:	Yes (10 Meters Nominal)
User Manual:	Yes
